DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-11, drawn to an article, classified in class 428, subclass 99.

II. Claims 12-20, drawn to a process, classified in class 29.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product can be practiced with another materially different product such as one without first and second flange portions.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. During a telephone conversation with Mr. Stone on February 24, 2004 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-11. Affirmation of this election must be made by applicant in replying to this Office action. Claims 12-20 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Allowable Subject Matter

5. Claims 1-11 are allowed.

REASONS FOR ALLOWANCE

6. The following is an examiner's statement of reasons for allowance: the prior art fails to teach or suggest an apparatus for positioning rebar comprising a semi-cylindrical portion defining first and second opposing substantially straight edges and two opposing ends; a first flange portion and a second flange portion extending outwardly from the first and second straight edges, respectively; and first and second receiver portions extending longitudinally from said respective first and second flanges beyond one of said ends, said first and second receiver portions being configured for receiving rebar.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S AMENDMENT

7. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Stone on February 24, 2004.

The application has been amended as follows:

Non-elected claims 12-20 have been canceled.
